

Raul Rogojan

Junior Front-End Developer

My name is Raul and I am a devoted person. I like creating things, I'm always thriving to create something better. I am passionate about art, video games, and cars. I always find myself trying to figure out how every little detail works in anything I am interested in. With my new passion for front-end development, I am looking forward to becoming a very capable front-end developer.

WORK EXPERIENCE

Graphic Designer General Prest SRL

10/2019 - 02/2021

Achievements/Tasks

- Wordpress
- cPanel
- Affinity
- Photoshop
- OpenCart
- CorelDraw
- Illustrator

PERSONAL PROJECTS

Summit Tech

- Working on this project, I decided to get out of my comfort zone, trying to recreate functionalities that I have seen on other web pages. It was a challenging project that has left me with a better understanding of tools such as the GreenStock Animation Library, which will greatly help any future projects.
- <https://summittech.ro/>

Burger Restaurant

- Scrolling through Behance, I came across [this website design](#) by Zamil Ahamed. Seeing the design, I wanted to code it as it would challenge everything that I've learned until that point. I did have to make some changes because I could not find all the images that Zamil used.

Carousel

- This was the first project that I've made by myself. I've combined some information from some tutorials that I've watched, made some research, and with some help from forums I managed to build a rotating carousel that is easy to maintain.

To do app

- This project was a challenge regarding both javascript and CSS. Building the To-do list app exposed me to lists, objects, saving to the browser, customizing form radio buttons and many more.
